ELECTION/RESTRICTION

1. Applicant's response to the Restriction requirement filed in Paper No. 13 filed on September 19, 2001 is acknowledged. Applicant's election of Group I with traverse, claims 1-34, 41-44 and 48-53 is acknowledged. Groups II-IV, claims 35-37, 38-40, 45-47 and 54-55 have been cancelled.
2. Upon further consideration, it is the position of the Examiner that the Applicant's election of Group I, claims 1-34, 41-44 and 48-53 contains multiple independent and distinct inventions and is therefore subjected to a new restriction requirement.
3. This application contains claims directed to the following patentably distinct species of the claimed invention. In the event applicant elects Group I applicant is required to elect a gene. Claims 1-34, 41-44 and 48-53 are generic to plurality of disclosed patentably distinct species, based on structural and functional differences, comprising:
 - Species A, drawn to agfA gene
 - Species B, drawn to agfB gene
 - Species C, drawn to csgA gene
 - Species D, drawn to csgB gene

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

4. Because these inventions are distinct for the reasons given and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper. Moreover, in the absence of restriction it would place an undue search and examination burden on the examiner.

Art Unit: 1645

5. Applicant is advised that the reply to this requirement to be complete must include an election of invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Any inquiry of the general nature or relating to the status of this general application should be directed to the Group receptionist whose telephone number is (703) 308-0196.

Papers relating to this application may be submitted to Technology Center 1600, Group 1640 by facsimile transmission. The faxing of such papers must conform with the notice published in the Office Gazette, 1096 OG 30 (November 15, 1989). Should applicant wish to FAX a response, the current FAX number for the Group 1600 is (703) 308-4242.

Any inquiry concerning this communication from the examiner should be directed to Vanessa L. Ford, whose telephone number is (703) 308-4735. The examiner can normally be reached on Monday – Friday from 7:30 AM to 4:00 PM. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Lynette Smith, can be reached at (703) 308-3909.
